### Objectives and introduction of the lesson

#### A: introduction of the lesson

In this course, the students get acquainted with the theoretical and practical issues of ethical principles and how to establish professional communication in nursing and provide care to specific clients/patients and their families based on human and professional values. In this course, learners analyze and practice ethical issues in the field of nursing work and ethical decision-making in order to strengthen their professional ethics skills.

The teaching method is such that the student will get acquainted with the theoretical and practical topics of ethical principles and how to establish professional communication in nursing through a combined virtual face-to-face method. During the semester, in face-to-face classes, students will discuss challenges and ethical considerations

through group discussion and question and answer. In virtual teaching, students can present their work in groups and individually in connection with their project in the discussion room in order to do half and half of practical work. Also, during the semester, useful educational materials will be presented in the Navid system for discussion in the face-to-face class. In fact, this method, which is called the inverted class, can help to understand and understand the moral issues of students and their better learning.

## **B: General objective**

Getting to know the principles of nursing ethics and professional relationships

## **C: Specific objective**

### **1- Cognitive:**

At the end of this course, the student should be able to:

1. Define research.
2. Explain the meanings of research words.
3. Choose the topic of the research.
4. Explain the research problem well.
5. Explain the method of reviewing the texts related to the research.
6. Formulate the research objectives.
7. Research questions
8. State the hypotheses of the research.
9. Explain the types of research.
10. Define the research community.
11. Describe the sampling method and determine the research sample.
12. State the research environment.
13. Explain the method of data collection (questionnaire, observation, interview and measurement scales).
14. Explain the method of various research designs.
15. Explain the variables in terms of role and scale.
16. Sampling methods. to compare different research plans.
17. Explain the study control methods.
18. Explain how to secure internal and external validity of the research.
19. Explain how to secure the validity of the research.
20. State the ethical considerations in the research.

### **2- Psychomotor:**

At the end of the course, the student should be able to write a proposal. Write a scientific-research article well. Criticize and judge research and scientific articles and proposals.

### **3- Attitudinal:**

The student should be engaged in learning with interest and motivation during the course

### Determining face-to-face lesson sessions

No	The title of the face-to-face meeting	Date of presentation	How to present	How to provide the necessary facilities
1	<b>History - Modern Nursing</b>	20 - 2 - 2024	Lecture/question and answer/reverse class/group activity	Laptop/video projector/whiteboard
2	<b>Types of Ethics- Ethical Theories</b>	27 - 2 - 2024	Lecture/question and answer/reverse class/group activity	Laptop/video projector/whiteboard
3	<b>Ethical Principles</b>	5 - 3 - 2024	Lecture/question and answer/reverse class/group activity	Laptop/video projector/whiteboard
4	<b>Autonomy- How is consent obtained? disclosure of patient information</b>	11 - 3 - 2024	Lecture/question and answer/reverse class/group activity	Laptop/video projector/whiteboard

### Determining non-attendance sessions

Anticipated non-attendance part (including the title, date of presentation, the second session of all the in-person and non-attendance sessions)			The reason for the possibility of absenteeism	The method of covering content in absentia (Including how to present, being online or not, required facilities, etc.)
No	The title	Date of presentation		
	<b>Interpersonal Skills in Nursing Criteria of a profession</b>	16 - 4 - 2024	Flipped classroom - discussion in the discussion room	Offline teaching (podcast movie and teaching file - online teaching in the discussion room in the Navid system
	<b>Nursing code of ethics - definition of conscience; Manner; Value; Virtues</b>	23 - 4 - 2024	Flipped classroom - discussion in the discussion room	Offline teaching (podcast movie and teaching file - online teaching in the discussion room in the Navid system
	<b>Honesty and Truthfulness- Confidentiality- Privacy and Limits of Confidentiality</b>	30 - 4 - 2024	Flipped classroom - discussion in the discussion room	Offline teaching (podcast movie and teaching file - online teaching in the discussion room in the Navid system
	<b>Research ethics committees- justice and research</b>	7 - 5 - 2024	Flipped classroom - discussion in the discussion room	Offline teaching (podcast movie and teaching file - online teaching in the discussion room

				in the Navid system

## Self-examination, assignments, term-long and end-of-semester projects for students

- **Self-examination:** In this lesson, students individually and in groups of each session criticize part of the course content that was explained in the previous session.
- **Semester-long assignments:** Before each session, the student must have pre-reading based on the course and lesson plans so that he can participate in class activities in the form of questions and answers and group discussions. Also, during the semester, in the discussion room of the Navid system, they can answer or criticize the questions of the professor and other classmates.
- **Semester long project:**
  1. A class seminar in the form of a report or a review article structure about one of the challenges of nursing ethics and professional relations in care and presenting evidence-based challenges management solutions in face-to-face classes and discussion rooms in Navid system.
  2. The proposed research plan or scientific report should be based on source writing with reliable software such as Endnote.

## Other learning activities

### Discussion room (forum) in Navid system

Dear students, use this section to discuss practical work and complete the project. Set a time in advance for each discussion with the teacher and classmates. Also, other teaching aid materials will be uploaded in the Navid system for the development of learning

## Evaluation of students

How to

:(evaluate a theoretical unit (a theoretical unit

A) Formative: active presence in class, answering assignments on time

b) Final: four-choice and descriptive questions

:(c) Evaluation of practical unit (half unit

Evaluation of practical work includes two stages of group work (oral) and presentation of a written report based on authentic reference writing in Vancouver. In the first part,

students individually or in groups discuss a topic such as ethical challenges in caring for the elderly, comatose patients, dying, brain death, abortion, organ donation, euthanasia, marriage and divorce, children, addiction, pregnancy and population. and choose... Then, based on reviewing the texts in the form of PowerPoint in the discussion room and face-to-face class, they expose it to the criticism of the professor and classmates. At the end, by applying the comments and suggestions, they present a written report in the form of a .log file or PDF

:d) How to calculate the score including

Class attendance and virtual activity during the semester: 2 marks of practical project: 6 marks Final exam: 12 marks

g) End of semester exam time: according to the faculty exam schedule

- ✓ **Name and family name and signature of the teacher responsible for the course**
- ✓ **Name and surname and signature of the group manager**
